# Battery-powered Shades by Lutron

## Simple. Affordable. Convenient.

Ultra-quiet Serena® battery-powered shades install wirelessly and can be operated from anywhere in the room using a remote control. These luxury shades—**starting at just $399** —were designed with your lifestyle in mind.

**Two design styles**
Available in roller or insulating honeycomb shade styles

**Easy to install**
Shades install and operate without wires

**Low maintenance**
Shades feature industry-leading battery performance; batteries can be replaced without taking down the shades

**Smart Device Control**
Use the Smart Bridge and free Lutron App for convenient control from anywhere

**Fashionable aesthetics**
Choose from a wide variety of fabric colors and textures

**Cordless design**
A safe solution for homes with children or pets

# Roller Shades

A contemporary and stylish window treatment that combines superior functionality with a clean and elegant aesthetic.

- Roller shade sizes available as wide as 96" and as tall as 120"
- Uses 6–8 store-bought D-cell batteries, depending on size
- Sheer, translucent, and blackout fabric options

Choose the headrail option that meets your style needs (fabric wrapped fascia shown)

- Available with or without fabric-wrapped fascia
- Inside or outside mount available

Designer hembar style offers a clean aesthetic that complements the chic look of the roller shade panel

# Insulating Honeycomb Shades

A stylish, functional, automated shade that provides convenience, enhances your décor, and saves energy.

- Insulating honeycomb shades available as wide as 96" and as tall as 104"
- Uses 4–8 store-bought AA or D-cell batteries, depending on size
- Sheer, light-filtering, and room-darkening fabric options

Color-matched headrail can be installed on its own, or paired with your own top treatment

- Inside or outside mount available

# Visual appeal

**Block the sun in style.** Press one button and shades move in perfect unison, staying aligned across adjacent windows—giving your home a unified look both inside and out.

# Product features

## Styles and fabrics

With fabric options in varying opacities from sheer to blackout, Serena® roller shades transform a space by allowing just the right amount of sunlight into a room. A wide variety of colors, from classic neutrals to vibrant bolds, are available for every taste and application. Unique textures such as two-toned weaves, woven fibers, and delicate linens add to your design choices.

## Top treatment options

**Roller shade with fascia—**
for a complete, finished look

· Fabric-wrapped fascia matches the roller shade fabric

**Roller shade without fascia—**
for windows that will use a separate, custom top treatment

· Versatile design that works with cornices, swags, drapery, or valances

## Easy maintenance

· Innovative headrail simply tips forward to reveal the battery tray—without taking the shade down

Tip down the headrail.

Change the batteries and tip headrail back into place.

\* Matching cordless manual shade options are also available.
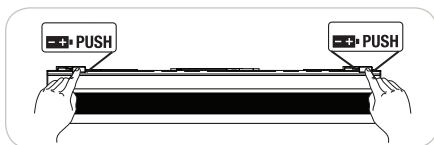

**Honeycomb shades**

# Product features

## Styles and fabrics

When selecting a Serena® insulating honeycomb shade, you don't need to sacrifice fashion for function. Whether you want to cut glare, add insulation, or block sunlight, you can choose from a beautiful palette of colors and textures that will meet those needs, while adding a signature look to any space.
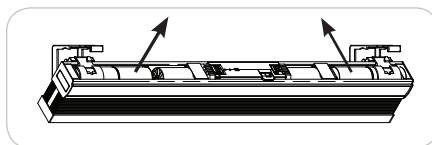

Fabric options include woven linens and airy sheers, in colors ranging from traditional neutrals to bold hues. Honeycomb shades are also available in several opacities, including light-filtering and room-darkening.

## Easy maintenance

Our exclusive Tap n' Tilt™ technology makes changing the batteries a breeze, without ever taking down the shades.

Simply press the release buttons, allowing the headrail to tilt forward.

Change the batteries and snap the headrail back into place.

* Matching cordless manual shade options are also available.
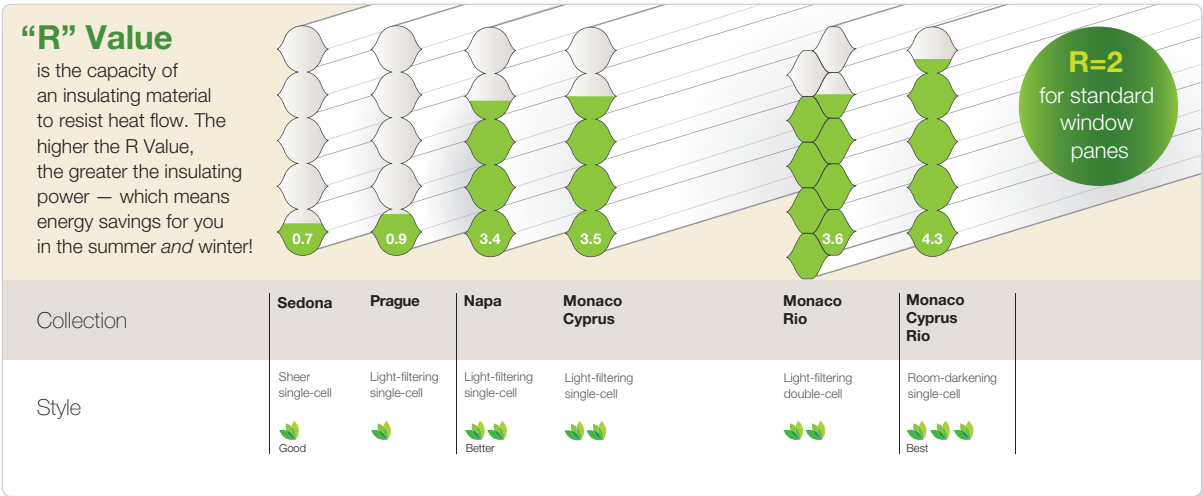

**Insulating honeycomb shades**

# Effortless energy savings

Lowering shades in the summer prevents the sun's rays from heating up a room, while raising them in the winter captures heat from those rays, helping you save energy and money.
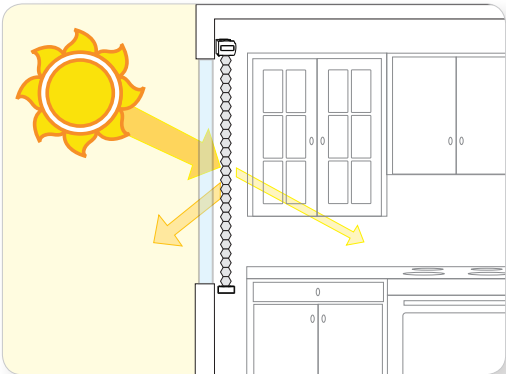

Serena® honeycomb shades capitalize on that energy savings. In fact, they can double the insulation of your windows.

Serena honeycomb shades have pockets that trap air, providing superior insulation when lowered. They come in a variety of styles, and as you can see from the following chart, deliver varying R values depending on the style.
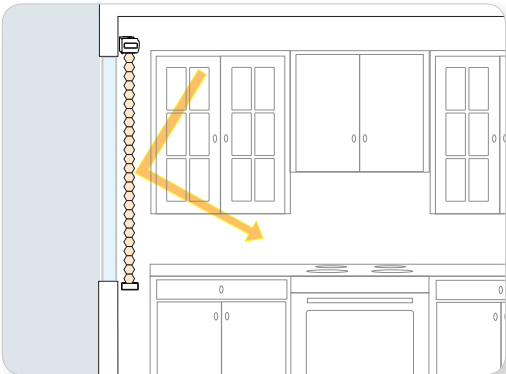

# Honeycomb shades

## "R" Value

is the capacity of an insulating material to resist heat flow. The higher the R Value, the greater the insulating power — which means energy savings for you in the summer *and* winter!

**R=2** for standard window panes

| Collection | Sedona | Prague | Napa | Monaco Cyprus | Monaco Rio | Monaco Cyprus Rio | |
|---|---|---|---|---|---|---|---|
| | 0.7 | 0.9 | 3.4 | 3.5 | 3.6 | 4.3 | |
| Style | Sheer single-cell | Light-filtering single-cell | Light-filtering single-cell | Light-filtering single-cell | Light-filtering double-cell | Room-darkening single-cell | |
| | Good | | Better | | | Best | |

## Summer energy savings

Reflect summer sun and keep inside air cooler

## Winter energy savings

Prevent heat loss in winter, keeping inside air warmer

**Wireless remote control**

# Control from anywhere in the room

## Wireless remote control

**A wireless control operates via radio frequency (RF),** allowing flexible control of your shades from anywhere in the room. Our wireless remote is ideal for use with shades installed behind a drapery, a valance, or a cornice because the remote's signal doesn't require line-of-sight to the shade for it to operate flawlessly.

You can choose from a single-group Pico® wireless control or a hand-held 4-group remote.

## Single-group wireless remote control

This option allows you to **control a single shade** or **multiple shades with one button press**.

You can:
• use the Pico® as a hand-held device
• mount it wirelessly to a wall
• place it on a tabletop pedestal

Pico wireless controls on a dual tabletop pedestal

Pico wireless control on a tabletop pedestal

Hand-held Pico wireless control

Pico wireless control in a Claro® wallplate

# 4-group wireless remote control

This remote allows you to **control up to four groups of shades with one remote control**. A group can be a single shade or multiple shades. You can also create one preset level for each shade group that is programmed to the remote.

This control is only available as a hand-held device and can't be wall-mounted or placed on a pedestal.
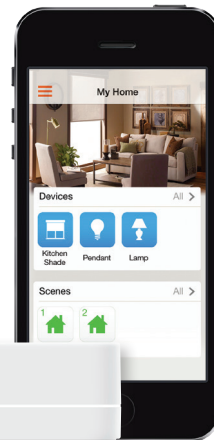

# Control from anywhere in the world

## The Smart Bridge and Lutron App

With the Smart Bridge from Lutron® you can control your shades from anywhere in the world using your mobile device. Simply plug the bridge into your wireless router and download the free Lutron App for the ultimate in shade control.

You can also use the app to set timeclocks, so your shades will automatically adjust at certain times of day. This feature provides added convenience as well as security (your home will looked lived in even if you're away on vacation).

Works with
Apple HomeKit

## See how easy it is to:

- Measure for Serena® shades
- Choose the control that's best for you
- Install the shades
- Program the control
- Change the batteries
